Subject: introduction?

Hey Bill, I'm about to start introducing Steve Carter, the ED of the North American Land Trust to folks at EPA. He is very interested in working with Superfund sites re conservation easements. If you are interested, I'd like to start with you. He'd like an introduction to your friend at BASF too which you may be able to do. I was also going to introduce him to Frank and Matt Sander.

And btw, I touched base with an old friend who is now the ED of the Trust for Public Lands for Georgia/Alabama and he is interested in contaminated property redev too! I could possibly schedule an in-person between the two of you with me on the phone if you'd like.

I know you are super busy so don't feel obligated on any of this - I just know how much you love this topic!

Lemme know....
